
Enriched in
1 CI13 (TEX)
2 Arm (TMEM)
T cell proliferation ation
RNA MRNA processing
Antigen res se-inv y
DNA transcription repair
Mitotic sister chromatid segregation
Mitotic spir cycle
Defense response to virus
Respon uction
Microtubule cytoskeleton organization involved in mitosis
tein endoplasmic reticulum
Actin polymerization assembly
Leukocyte mig n chemotaxis
Cilium
Establishment of organelle localization
Pyrimidine monophosphate metabolic
Vesicle localization membrane
Endotheli wth factor
Protein autophagy acetylation
Glucose biosynthetic metabolic
Postsynaptic synapse assembly
Metanephric kidney development
Response mitochon al apoptotic
Lipoprotein lipid metabolic
Neuron differentiatio development
Epithelial morphogenesis development
Proteoglycan b synthetic metabolic
Hormone metabolic biosynthetic
Bone chondrocyte differentiation
Sodium potassium ion
Sensory camera eye
Cardiac development morphogenesis
Fatty acid metabolic
Acid transmembrane transport
Synaptic secretion behavior
Insulin protein secretion
Skeletal cardiac muscle
Calcium ion transmembrane
5489 gene sets, TSNE on gene-set similarity
